About This Game

PUTREFACTION 2: VOID WALKER

Putrefaction 2: Void Walker is a sequel to FPS Putrfaction, released in 2015, offering much more improved and fast-paced gameplay and more lighter action-adventure tone.

STORY

After destroying ancient evil in the first game, you were transported to another galaxy and became Void Walker - a warrior, who travels to a different worlds and times in search of the ultimate enemy. Now you must work for mysterious being, searching for clues and blasting through enemy hordes to find the answers.

FEATURES

- 1) Improved, more fast-paced gameplay
- 2) Brighter and more colorful game world
- 3) New weapon and player upgrade systems
- 4) Three different worlds and time periods to explore
 - 5) New and improved survival mode
 - 6) Different player abilities and perks
- 7) More expansive and open-ended level design than the first game.
 - 8) Over 100+ different achievements!

Mass Effect 2 is an adventure I will never forget.

In my personal opinion, Mass Effect 2 is one of the best sci-fi RPGs ever made, the world Bioware created is unique, diverse and wonderful, not to say everyone is hugging each other while hopping over rainbows.

The game presents you with many moral and ethical choices, an example is a mission which requires you to blow up a mass relay, but doing so will destroy a colony with over 300.000 residents, but if you don't do it the system will get invaded by the Reapers. (Giant robots with lasers, you have to play the game to understand.)

You truly get to form your own personality in the game, do you assert and be a badass, or do you show compassion and be a hero? as you advance in either direction you unlock new dialogue options and actions, ranging from giving someone a hug to kicking someone out of a window.

Every crew member has a very developed personality, and you will feel attached to most of them, you can even develop relationships and they aren't limited by species or gender (Sadly, you can't be gay, only lesbian, this confused me a little). You can do them personal favors to make them loyal to you, increasing your chance of surviving the suicide mission at the end of the game, I have seen some of my beloved crewmembers die in my first playthrough, I was actually crying over the death of a fictional character.

But Mass Effect is still a game, not a futuristic dating sim, you can choose to skip the romance entirely, and you don't have to recruit certain crew members if you don't want.

The gameplay is solid, sometimes the 'one-button-does-everything' system gets confusing, running, taking cover and interacting with things is all bound to one button, which can lead to confusion sometimes.

When you start the game you get to choose a class, some specialize in weapons, others in tech (this means you get to use combat drones, tech to drain shields and incinerate or freeze enemies from a distance, and others in biotics (space magic, you get to lift people off the ground, or throw them a few feet away or you can spawn tiny black holes), most of these powers are well balanced and satisfying to use, some of them feel a bit silly though. (I'm looking at you, shockwave..)

You can explore a lot of different star-systems, you can scan planets for resources and you may just find a secret side-mission, these do feel a bit cheesy sometimes though. (you enter a hidden facility and the merc leader just keeps saying 'you shouldn't have come here, prepare to die').

Whenever you investigate a planet you get a little information about it, like the surface temperature, atmospheric pressure, even travel advisory sometimes, and some even have traces of past civilizations who were space-faring long before that fish with legs on earth crawled out of the water to eventually become a monkey.

Mass Effect 2's soundtrack is great, the music in the main missions really made me feel like I was in a dire battle to save the galaxy from destruction, the music that plays during the suicide mission is just.. damn, I still get goosebumps from it, it's truly an epic piece.

Sadly, Mass Effect does have its weak-points, as missions can feel a bit repetitive sometimes, hub-worlds are smaller than they

were in Mass Effect 1 and DLC is obtained in a very annoying way, you have to make a Bioware account and buy Bioware points with real money, these points you can then spend on the DLC, I would prefer to buy DLC directly through steam without using these Bioware points.

If you want to play DLC you need to be online when you launch the game, otherwise it simply won't load or show up.

There are also a few annoying bugs that never got addressed, sometimes I run into an object and get teleported on-top of it, then I either have to wait until I die or I have to quit to the main menu and then load the save again, sometimes during conversations characters are facing the wrong person or are doing some really weird stuff with their head.

Mass Effect 2 is an epic game, and I would recommend every RPG or Sci-Fi fan to give it a try, there is a whole galaxy full of different races, friends and foes to explore!

. If you love driving and if you love simulators, then this is the game for you.. Surprisingly easy to start up and learn. Has a lot of different leagues to choose from. Only thing it lacks imho is the second dutch league...

Great value for money ;). Amazing. It's basically QWOP with frogs. It feels so satisfying climbing up someone else.. nice looking skin. Well this was a terrific surprise! The humor is quite on point, enough smut as expected. Larry gets the usual treatment but now everyone besides him is the product of our current schizofrenic times.

It is hilarious, characters are decently written and the puzzles are neither too easy or absurdly hard.. this game sucks i want my money back. DO NOT BUY

Should NOT be on early access yet, Only thing you can do is Bowling, The only person that would like this game in the state it's in is Roman Bellic!

Edit:

Tried to replay it a year and a half later First off the tutorial... why is it needed you just walk around and show off ALSO Where the **** are the graphics settings?!

Secondly verifying email is so annoying it doesn't send the email half the time and even after all that I can't even chnge my in game name?!

As a transgender that's needed badly I have my old ugly name f**k off if you think i want to see that all the time In conclusion this game is♥♥♥♥♥still even a year later.. If you like to walk randomly around for hours with no direction from the game just hoping you might figure out what you are supposed to be doing and pick up random items that you are told absolutely nothing about what they do or what they are used for than you'll love it!

Although it can be and is a really fun game if you can forgive the major shortcomins. I eventually couldn't.. The game that the U.S. Army commissioned as a training simulator and then never actually used.. Awesome game. Its very nice and the only cons it that I cant shoot using buttons.. Pretty but not a game.. I honestly wasn't expecting much, but this game made me laugh out loud more times than most AAA titles this year. Well worth your money. Give it ALL the money.. If you're looking for a very chill game, something you can play while watching tv or doing other things, this is it. Simple yet highly addictive!. Really bad popup and fog, AI is really dumb. 3/10. <----Ghostbusters fan. DO NOT BUY THIS GAME!!! I have been a fan of the series from the original movie to the cartoon, and even to the new crappy movie that came out. I still have the original ecto 1 toy and firehouse toy. If I wanted to play anything in the world in VR, it would be Ghostbusters. Sadly, I wanted these games to be it. These 2 games(now hiring & showdown) are an affront to Ghostbuster fans and anyone with a pulse that plays video games. This was a cash grab for the developers only. I have the Oculus Rift(which it says it supports) and I "played" 6 minutes of the game. I say "played" because I gave the game 6 minutes to allow me to play it. I figured out 2 things in those 6 minutes: 1. How to cross the street. 2. How much lube I will have to buy next time I throw money at this developer's games. If the controls in a VR GAME take more than 30 secs to figure out, immersion is broken. At this point I am ranting and you can stop reading, but if you choose to, read on. I watched the video playthrough of both games because of the bad reviews and because I was fully excited to experience the games IF they were truley not worth it. The games are normally \$7-\$10 a game and the play time is like 15 mins. Normally not worth it. But it's Ghostbusters, right? WRONG! I remember when they went on sale a few weeks ago and said "screw it! I want me some VR Ghostbusters". I eagerly shoved my headset on and anticipated the awe and wonder of what I would experience. I can safely say that even if I had invested in this game, I would have counted my losses and even vocalized not to purchase such a shoddy product. I remain in high hopes that one day we will experience a truely fantastic Ghostbusters virtual reality experience, but for the love of GOD, this is NOT it!. Maybe 2 hours of relaxing and satisfying puzzling. Less if you are rushing but I played whilst watching some TV. Pretty easy for the first 25 levels, then requires a bit more thought.
